

Electronic Thermostat for Outdoor Room Temperature Control

Part of the µTemp range, model PD-012 is a weatherproof thermostat for room heaters up to 3kW. Unlike mechanical thermostats it has just 1°C of switching differential so it maintains a much more stable temperature.

- ◆ Pre-wired for UK mains (other connectors are available)
- ◆ May be used for heating or cooling appliances
- ◆ Waterproof temperature probe included
- ◆ Simple installation and adjustment
- ◆ Splashproof to EN60529: IP54
- ◆ 240V AC 13 Amps (3kW) rated

◆ Use it in your Greenhouse, Stables, Aviary or Chicken Coop

- ◆ Temperature control range 1°C to 26°C
- ◆ Low switching differential of 1°C
- ◆ 0.8m cable to plug
- ◆ 1.8m cable to socket
- ◆ 1.5m cable to temperature probe
- ◆ Temp probe can be inserted in soil
- ◆ Main box 100mm x 100mm x 50mm
- ◆ May be fixed to a panel or wall
- ◆ Simple changeover to cooling mode
